\*

The specification is objected to because of an informality. The abstract should be revised to reflect the subject matter now claimed. Applicants attempt to overcome this objection is acknowledged. However, the abstract should be supplied on a piece of paper which contains no text other than the abstract.

\*

The following is a quotation of the appropriate paragraphs of 35 U.S.C §102 that form the basis for the rejections under this section made in this action.

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 20 is rejected under 35 U.S.C. §102(b) as being anticipated by Klinger (USP 5,399,570).

Klinger discloses (col 13, line 58) the following compound:

Sar-Asp(OBz)-3,3-diphenylpropylamide

This corresponds to applicants' variables as follows:

F' = hydrogen;

G = substituted aralkyl;

B = methyl;

X = hydrogen

Thus, the claim is anticipated.

\*

No claim is allowed.
